I am a full stack developer comfortable with modern and legacy programming. I solve problems and make things work better. Not afraid of new things or responsibility.

Skills

- Python, Django, Django Rest Framework, GeoDjango, PostgreSQL, PostGIS, MSSQL, OpenLayers, MapBox (5 years)
- AWS (ECS, S3, CLI scripting), Docker (5 years)
- Google APIs, MapQuest, Git (10 years)
- Linux shell, Apache, Ngnix (10+ years)
- PHP, Yii, Laravel (10+ years)
- Html, CSS, SCSS, JavaScript (10+ years)
- QuickBooks Desktop integration w/CDATA python connector (just started)

Experience

2017 - PRESENT

Senior Developer / Silvics Solutions, Birmingham, AL

Full stack Python/Django/JavaScript development of forestry business web app. Part of a team of 3 maintaining a legacy application while building a more modern replacement. Created a docker stack of our EC2/RDS deployed applications for local development.

2012 - 2017

Senior Developer / SharpSoft, Tampa, FL

Developed a large PHP based medical waste application that managed medical waste routes, generated pixel perfect medical waste documents, created contracts, automated invoicing and credit card processing.

2001 - 2012

Web Developer / Self Employed

Worked on web development for many interesting companies and government agencies. A lot of front-end work and building sites for smaller companies.

1998 - 2001

Animator-Artist-Writer / Hecklers, Tuscaloosa, AL

Creating humorous content for an AOL content provider and greenhouse project. Created some of the first flash-based cartoons and games on the internet. Streaming a 14.4k. First got interested in programming to develop games and to help solve problems our web developers had serving our content.
